

The mission of the Evan B. Donaldson Adoption Institute is to provide leadership that improves adoption laws, policies and practices – through sound research, education and advocacy – in order to better the lives of everyone touched by adoption.

To achieve its goals, the Institute conducts and synthesizes research; offers education to inform public opinion; promotes ethical practices and legal reforms; and works to translate policy into action.

Please support the Institute and its unique initiatives. Here are just a few of our current projects:

- **TRANSCULTURAL ADOPTION & IDENTITY**
With seed funding from the Kellogg Foundation, we are examining factors that contribute to healthy identities for internationally and transculturally adopted people, including “best practices” and practical recommendations.
- **RIGHTS & WELL-BEING OF BIRTHPARENTS**
This unprecedented research, which is yet unfunded, will expand the understanding of key policies and practices that are most helpful to birthmothers/fathers during the adoption process and throughout their lives.
- **EXPANDING RESOURCES FOR CHILDREN IN FOSTER CARE**
This project is designed to increase the pool of adoptive parents for children who need permanent homes, with seed funding from the Gill and David Bohnett Foundations.
- **EDUCATE THE EDUCATORS**
The Institute conducts workshops for teachers and school administrators, as well as presentations at conferences, to improve curricula and create a supportive environment for adopted children in schools.
- **EDUCATE THE MEDIA**
This unique program provides accurate information and up-to-the-minute research to reporters across the nation, conducts media workshops at conferences nationally, and provides training for journalists and editors.
